

The following guide uses images from WinXP. But - it should be similar in Vista and Windows 7

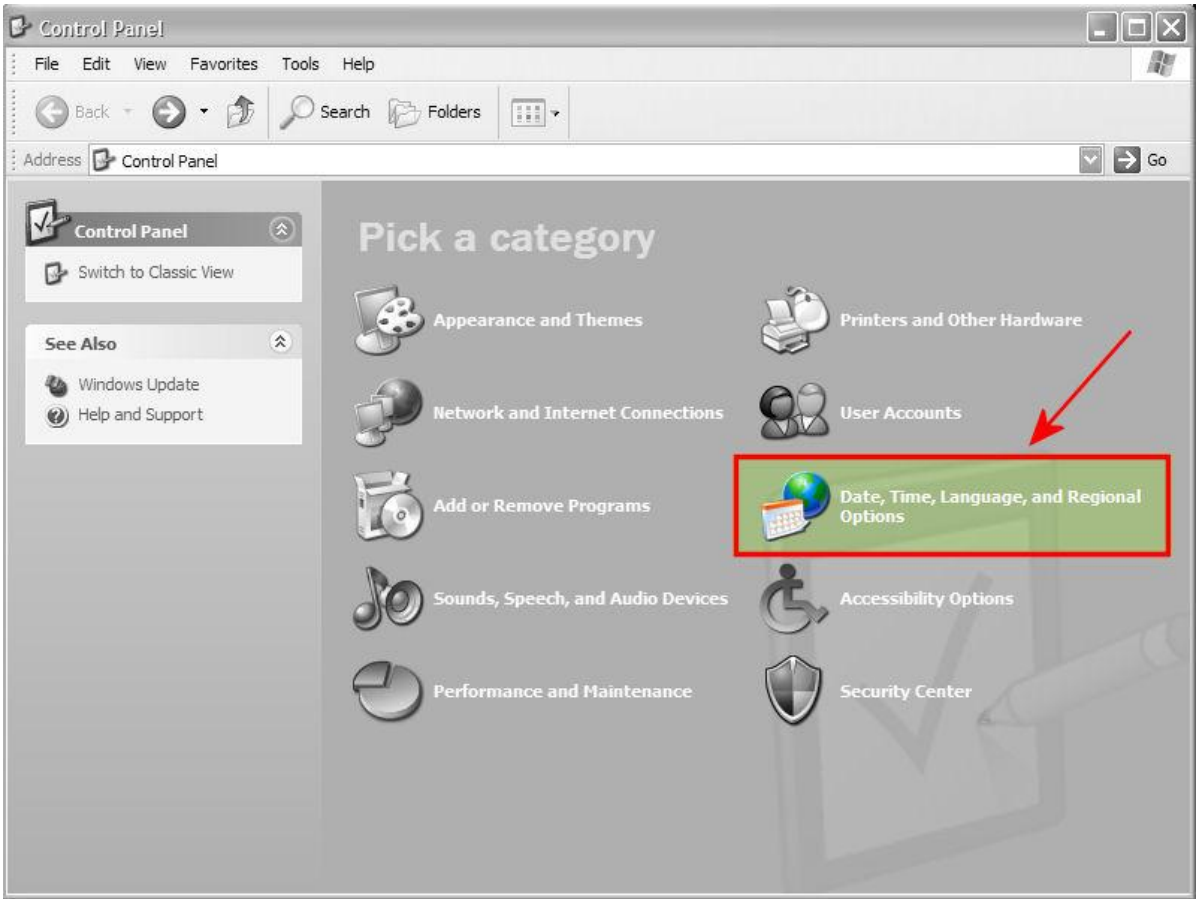

For Vista or Win7, you must be logged on as an administrator or a member of the Administrators group in order to complete this procedure.

1. Open Regional and Language Options in Control Panel.

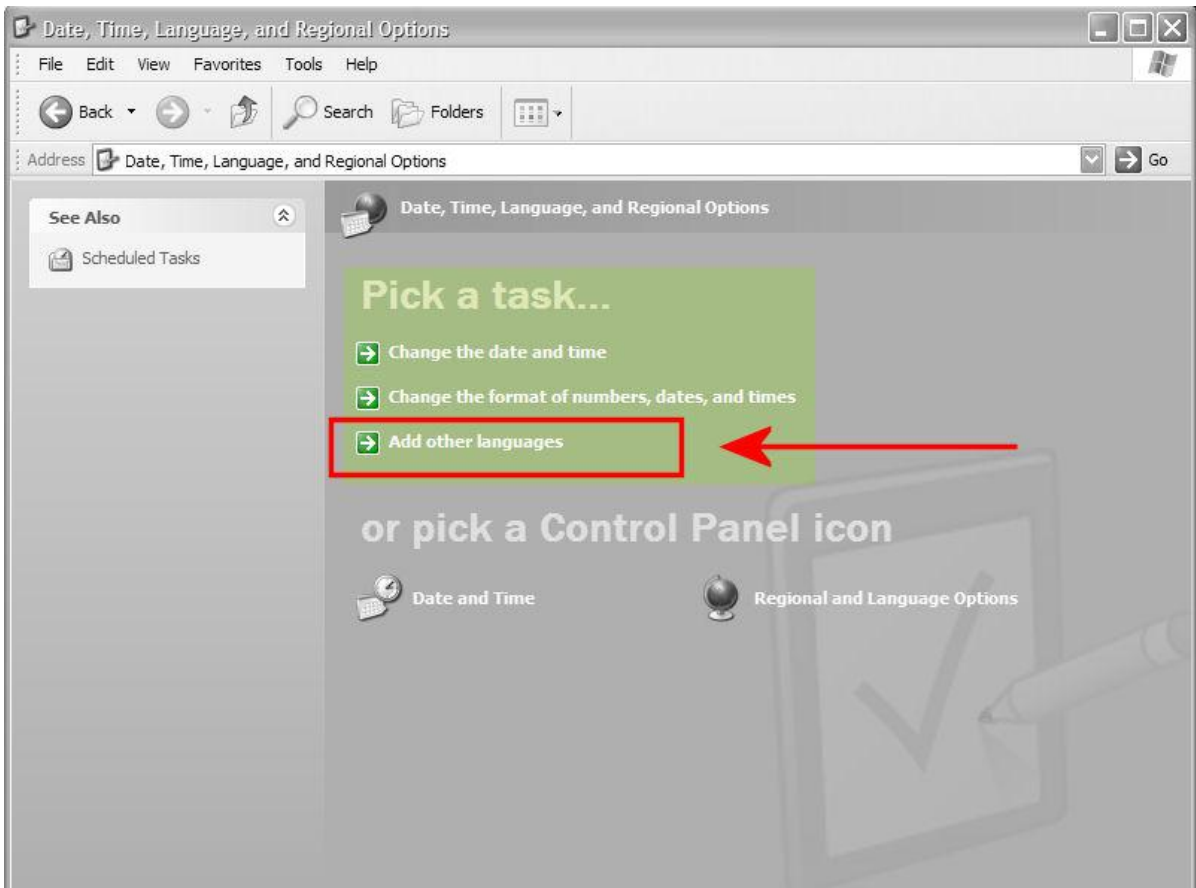

There are two ways in which Control Panel opens. "Menu" Style & "Link" Style. I will picture BOTH ways, below.

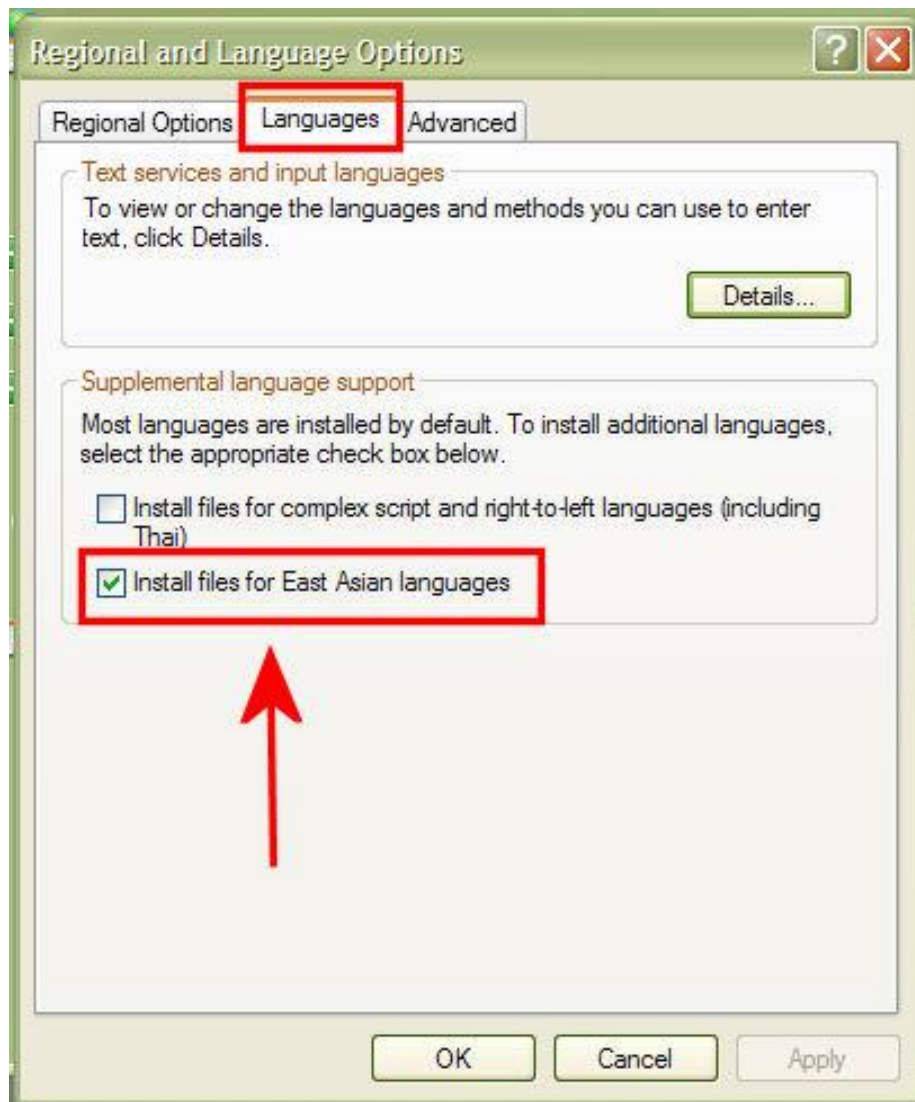

Control Panel as a Menu

Control Panel as a Link

2. On the Languages tab, select the *Install files for East Asian languages* check box.

3. Click "OK".
4. You will prompted to insert your Windows CD-ROM . So, have your Windows CD handy.
5. After the files are installed, you must restart your computer.

By installing this option, you will not only be able to view the GAY NINJA Website, but you will have access to MANY more websites from overseas. ENJOY...!
